FROM THE GOLD MINES. 11,000 in Treasure by Express QUICK TIME FROM DENVER.

(Prom the St. Joseph Gasotté, August 21.)
The C. O. C. and P. P. Express arrived yes
erday, bringing dates from Denver to the 15t terday, bringing dates from Denver to the billions, and treasure to the amount of \$11,000. This trip was made by the Express in Fre days and eventeen hours, not sibeted.

of eight nours at one of the stations. This is quick traveling.

The news from the mines, as gleaned from the Denver News, is more favorable than recent accounts received here. The reports that the quarts mills are generally proving failures, is flaily contradicted. The editor of that paper has been on a tour to the mining districts, and, under date of the 8th flast, he writes thus from Mountain City and that vicinity:

The first mill we visited was that of Co. Gratiot, a large eight stamp mill with Chilian rafters. It has been running but a few days; has been demed up but once, after its first fifty-two hours' run, and yielded in that time one ounce less than nine pounds of amagam gold. This mill seems perfection itself; the great and distinctive feature being the Chilian studies.

ment, consisting of four imreense wheels weighing two:we hundred pounds each, revolving in a,
eircular groove of chilled iron, through which
all the quarts passes after leaving the stamp
mil. Is consequence it is reduced to an abacintely impalpable powder; and by the passage
through the Eureka amalgamator the gold is as
nearly all abstracted as probably can be with
any profit. Col. G. freely offers his tailings to
any one who wants them.

Next we visited the St. Lonia and Black Hawk
roats, of eight and twelve stamps respectively.

ny one who wants them.

Nost we visited the St. Louis and Black Hawk odds, of eight and twelve stamps respectively, both of which are doing good work, and, we earsed, giving sainfasteny remists. Six or eight other large mills are already running in the Gregory guleb, between its junction with the creex and the old Vandeventer mil half a mile above. Of their working we could, in our hasty visit, and being unacquainted with the proprietors, learn nothing. We heard of days work ranging from seventy-five up to four and five hundred dollars to the mill.

Great difficulty has been experienced in getting to the bed rock, in fact, we believe it has not been reached at all on any of the large bars axespt the Spassish, from which a great amount of gold has been taken. The bars are somnoised whelly of water-worn boulders and pebbles, through which the water flows with perfect free dom, and when a pit is sunk below the surface of the creek, it requires wigorous pumping to keep it clear. For this purpose a wast number of water wheels have been constructed and ply their labor day and night. When flamed for miles, and a regular system of mining established, the bed and bars of this stream will yield their hundreds of thousands of dollars; but under the present system of each for himself, the results will be reminerative only to the few. This stream very much resembles the Amei-CHICAGO ACADERY OF SCHEROLE.—The third Field Meeting of the Chicago Academy of Sciences will be held at LaSalie, on Thursday, August 30th. ADVERTISING EXPERPAISE.—Squibob had been looking at Cooke's new Directory for 1860. He had marvelled how the ingenuity of man had made that useful volume to overflow with advertisements. How they church to the covers, warmed over the back and got themselves allp-pery standing room standilled on the edges of the volume. An idea struck Squibob, who is human and humans. As the former he is keen for the "main chance" himself, as the latter he for the "main chance" himself, as the latter he is willing to help his neighbors in the same di-rection. Off he posted to the publisher of the Directory. "Sir," said Squibob, severaly, "air, you have shockingly neglected your interestain

Wil-son & Co., of Lesvesoverth, two of the mills to be set up this fall and the other two early in the spring. They will use water power, the facilities for which can hardly be excelled in the tape," pointing to the convenient tape that passes through the eyelets of the cover. A NEW WRINKLE AT THE POST OFFICE. [From the Montgomery (Ala.) Confederation.]

And wants are really as the stranger, with gad in hand, brought his team to a standatill in front of the Post Office on Friday, and leaving his load of hay in the atreet, clamped heavily up stairs to the Assistant Post Master's room. The bland and pleasing address of that funchave made any attempts to collect any interamounts due them, or who have been so unfortunate as to owe anything themselves. Various causes are assigned for this, but none
that we have seen are fessible. Some say it is
occasioned by the two or three thousand bules
of unsalable cotton is Mobile and New Orleans.
But eight or ten million dollars locked sigin unsalable cotton would not derange the commercial and financial affairs of the whole South.
Others say it is over trading, buying too maly
negros to make cottos, but cotton has brought
a fine price to the planter, though the largest
crop ever known. There have been no greatsales on credit, as in 1855 and 1856, and few of
any kind. The banks have not expanded, and
have done a wholesome business, and nave the
ordinary quantity, if not more specie in their
vaults. Our section is not in debt, and our
credit was never better, if as good, at the North
as every merchant who has been there can telify. So that our people were never in a more The bland and pleasing address of that functionary encouraged the rural good teman who stated that he had "come to haps a load of hay misled." Mr. Armstrong gasped and looked to have the application repeated. The statement was again made by the countryman, "the load of hay must be mailed, it had been bought by a continuan with this express agreement." gentleman with this express agreement."
The Post Master tried to explain, but nothing rould suffice, the visitor insisted that a condiwould seffice, the visitor insisted that a condi-tion of the sale was that the "hay must be mailed." Finally nothing could be done but show the indignant hay-dealer out. He could not and would not see why the Post Office regso and would not see with the rost officer of institute of and not see wicked was had evidently put an idea into a head where it had plently of room, and like Sterne's starting couldn't "get out" or be got out. vanils. Our section in me in debt, and our credit was never bester, if as good, at he North as every inserchant who has been there can teatify. So that our people were never in a more prosperous condition.

Why, then, this panie? Why this taking in sail by the banks and all prudent men whe deal in money and exchanges? We think the answer obvious. A pareel of recklass, resides and ambitious politicians—many of them with nothing is lose and everything to gain by a revulsion, by overturning the present peaceable, quiet, happy and prosperous erder of things, and substituting distrust, disorder, prevolution, and even anarchy in the government of the country—are bent upon disunion. Many of these people no change could damage; to them any change, no matter what, might be an improvement; they have nothing to do but to hap around the grog abops in the towns and villages and loaf ou the streets, and spout polities, abuse their betters for being aubmissionists and Free Soilers, and braine Rheit, Yancey & Co., as asints and aposties of liberty and Southern rights. With these leaders they expect to accomplish an overthrow of the existing Government. No one can fail to recognise the critical emidition of the country from the reputure these people have made in the National Democratic party.

According to their own calculations, Lincoln is sure to be elected, and then they are plaqed, and they are trying to pisdage the whole South, to disming and revolution. Their leaders may deny it till they turn blue, but the people won't be sensitive financier fail to perceive it, Honey is till, doney in till, and takes fright even at the possibili-The New Sherman House.—We notice that the process of roofing this noble structure has already commenced. Mr. Sherman informs us that he has employed Measra. Barrett & Arnold to cover his building with "Barrett's Falt and Composition Roofing." These gentlemen have been for a number of years engaged in this business, and by the use of good material, and a close application to business, have seemed for themselves and their Roofing a most excellent reputation, and we take pleasure in recommending them to the public generally. We understand, also, that they send large quantities of Roofing material, with instructions for ies of Roofing material, with instructions ise, to all parts of the country. Our countrionds should make a note of this, and seed neir orders where they are sure of getting a deny it in the turn nine, one the peace was believe it. Least of all will the keen optics of the sensitive financier fail to perceive it. Money is timed, and takes fright even at the possibilities of danger. Hence their present prudential movements. They see the possibility of danger ahead, and like a persistent mariner who sees a cloud rising in the distance, don't wait till it overshadows the heavens before he takes in sail. Menied men kow full well that a disreption of the Union would burst every bank in the South instanter. All gredit would be over-thrown—sommerce would become stagnant—money used for the ordinary pursuit of trade, would be necessarily employed for the parchage of arms and the necessary munitions of war, paying troops, building fertilications, and matung war generally. The plownhare would be best into the sweerd, and the pluning book into the apear, and the country turned into one vast military camp. These are the probabilities that frighten.

their orders where they are sure of getting a good ariseds. We learn that the new building is to be all enclosed the present month. The repidity with which the work has gone forward is truly astonishing, and certainly reflects great credit on the contractors.

Mr. John McDermott, the contractor for setting the atone front of this new hotal, completed his contract on Saturday evening. In the fulfilling of this contract, he has performed a feat which Chicago may boast of, in raising the atone a distance of eighty-four feet from the sidewalk—the greatest hight ever attained in atone-acting without elevating the derrick on the building.

Any. DS. MUNTIGOON.

Dr. Huntington has recently published a sharp reply to his critics, in the form of a proface to a book entitled "The Rock of Ages," republished from the English work. Dr. H. is a peculiar man. When I first heard him speak, I was intoxicated with the rich life that overflowed his whole discourse. The lone of his humanity and his rhetoric is exceedingly pleasant. No longer ago than yesterday a lady of outlare, a strong Unitarian, told me that she never altogether liked the thought of Dr. Huntington's sermon's, yet also was very much attached to the man and the paster, he was no warm in sympathy, so gental in intercourse, so kind and good in ministering at the fireside all gracious sympathy, so gental in infercourse, so kind and good in ministering at the firestine all gracious help and Christian comfort. THE DOUGLAS FAILURE AT PREEPORT.
An attentive correspondent at Freeport gives us further particulars of the great Douglas failure at that place on the 25d inst. He, with two others, counted the crowd, with the following result:

Wishing to ascertain the united forces of the masses, three persons were standard at the bridge, where they must the nameny and found they were ours; they accurately numbered every soult hat crossed—from the babe unward, men, doubtless, never stopped until they reached their homes. Douglastics, Reckin-ridgeitse, Belleveretts, and Republicans; and from moon till half past three o'cleck, about the time that Mr. Allen closed his speech, three crosses, all told, 5028. Now, if our verseity can be relied on, we would give the following figures to our friends abroad as the masses proced to a truthful estimate of the Allen Persons, 2002; one half of whom were wignen, children, and those in political minority, leaving 1016; deduct one-fourth, or 25d, Republicans, which is a low estimate, and this will leave the speaker, with 752 sturdy, rebellions als recorrain in Stephenson and three or four acquiring four.

which is a law estimate, and this will leave the apaaten with 458 stundy, raballious as records in Stephenson and three or four adjoining bounties, whom under the Fopular Bouseaulties, whom under the Fopular Bouseaulties, whom under the Fopular Bouseaulties, who will be a sometime of the County of the County

LET THE BALL ROLL! TRUMBULL IN HENDERSON.

bug chief desires not so be desirees in the race in his own State, he had better give up that search after his mether, and harry home in stimu to prevent the route of his party from being turned into a slispersion and annihilation.

Henderson is a small county—the whole pepulation not exceeding ten or twelve thousand; and the place of helding the meeting was in Oquaska, a town situated in the North-west part of the county. The greater part of the county lies away is the South and South-said of this place. The people of the South said of this place. The people of the South said of the county had already attended two mass meetings a few days previously, one at LaHarpe and the other at Macomb.

Yet, motavithesianding these drawbacks, there

Wide-awakes from that city to the number of 110 young men; and Monmouth sent a delegation of 500; and Young America township in Warren county, sent 50 Wide-Awakes, and the fathoat described in my last letter. But still, considerable more than 3,500 people must have sollected from the north half of this little county. Benton, Little Fork, money trees, understood of Creek, heades shose from Momouth and Buildington, with all the usual emblems, mostices banners, flags, peantings, and other campaig persphernals too numerous to esparately describe. But as at other meetings, three idea predominated in the emblems and sentiments

of the Union before it was repealed.

He displayed the matchless impedence of the Little Giant, in claiming sheder for his herey of non-infetervention the assette of Clay, Webster, and the true great their of the past, and proved by union of the history of the nation, the uniform and uniquestiqued exercise and recognition of the power over the Territorias by Congress. As a sampfified in the acts and declarations of every President, and the decisions of the Supreme Court as real as the votes of Congress. I cannot failuse thin at that time through his argument, which was illumined from time with any anecdates and fishing with true eloquence. Suffice it that the speech was furly worthy of the accusate, of Tates and of the Boundiers party, and was rapturously received by the orward of attentive, thoughtful, and delighted and dored.

After Mr. Tates had cloired, the meeting adjourned for an hour to de justice to the abundwhere that faction stands is relation to this important matter, while the emphatic demand in the Republican platform for "the speedy passage of the complete and satisfactary House bill," places the position of "Old Abe" and the Republican party beyond cavil or denial. This alone has broken the purities shackles which held thousends of Damocrats to the chariot of slavery.

The meeting in Oquawka, yesterday, was a good one in warry respect. The people gave

good one in every respect. The people gave their undisturbed attention, for two hours, to a their undisturbed attention, for two hours, to a speech of great power and elearness from Judgo Trumbull. It was one of his best efforts and made a profound impression upon the minds of his auditory. I heard of several Denocrats who had come a long way to hear him, who said that they were now satisfied, and should, herefore, set with the Republican party.

Hoa. Jackson Grimshow of Quincy, followed Judge Trumbull for an hear in a captivating speech, full of sharp, talling points, interspersed with with and anecdots, which made the antertainment like a densert after the solid parts of the bill of fare have beauthernsed.

After dark, five companies of Wide Awaltes, with their torches and bends of music paraded the principle streets, and then marched to the grove, where there were more speeches delivered by local speakers until 10 o'clock. The day's enterteinment wound, up with a teach-light After Mr. Yakes had closed, the meeting ad-journed for an hour to de justice to the abund-ance on the tables, which the liberal heated peoples? Vandalis had pryvided. Three long tables greaned under the substantials, the re-sults of the hephone, and the previations rap-idly disappeared under the steady stacks of the

Favoritiem in the Army.

Some things are so strange as not to be easily explained, even by the doctrine of chances. One of these marvels in the wooderfully good lack which Southern men have in our army, and the comparatively had lack of officers of Northern birth. To illustrate from the experience of the last few months: is also, two officers, one from the North and the other from the South, were tried in Oregon by an Army Court Martill. The Northern officer was dismissed, while the officer from the South was cashiered, and also inconpositated by the annince of the sourt.

States."

The President, in reviewing these proceedings, coatemed the sentence against the officer from the Northern States, while the much more serious sentence against the other officer was "disapproved." Another officer from the South "disapproves." Another officer from the Bouth was recently brough its before a neutral martial in the Wast, and sensemed to be dismissed. This neutral the President also disapproved, and restored the definquent to duty.

Mara recently one of the highest offices in the army became vacant, and two applicants, one from the North and the other from the South, were candidates for the appointment, and though experience and many other considerations seemed to favor the laster, he went to the walt, and the Southern officer "sout the honor." Nor is that all; by his premotion no less than three other officers, all twen the South of Masses and Dissort in were can promoted as

con and Diron's line, were each promnted a grade.

To are is a run of luck, we say, about this, which the doctrins of chances, as at present professed, does not explain. It has been supposed that the efficers from the Northbere States possess a fair average of merit, and aboutly, therefore, now and shee catch a plus; but it would assen that under the present Administration all the pluse full into Seuthern hats.

Never mind, we will change all that soon, ganismen. There is a Columbus coming who will discover North. America hafors many months.—A. 7. Pop.

Even to say that Congress possesses power to regulate at fairs in her own Territories, is equal to being a mark Republican in sontiment an offense sufficiently great to isolate a man from society. There is no hope for instituting reforms, or of reaching the minds of a majority of the people so as to effect a change by vote; for a few designing politicians have successfully created a frenzy in the popular mind that can only be alleyed by the judicious administration of Lincoln. The South needs nothing more than the influence of Lincoln at the head of national affairs. His influence and usofulcess would so far anypass his recent predecessors that it would act as a balm on the Southern mind, and drive away the last vestige of that fanaticism which now hangs like an incubus over the South, which, if not soon removed, will prove her sternal ruis.

Rostos, Ang. 201, per.

Dr. Huntington has recently published a sharp reply to his critics, in the form of a preface to a book entitled "The Rock of Ages," republished from the English work. Dr. R. is a peculiar man. When I first, heard him speak, I was intoxicested with the rich life that overflowed his whole discourse. The jone of his humanity and his rhetoric la exceedingly pleasant. No longer ago than yesterday a lady of culture, a strong Unitarian, told me that she never altogether liked the thought of Dr. Huntington's sermon's, yet she was very much attached to the man and the paste, he was so warm in sympathy, so gental in intercourse, so kind and good in ministering at the firstide all gracious help and Christian comfort. Criticism can easily find abundant want in the form of this man's life, but I think charity will find amon in the apicit of his devout heart and his faithful ministry. In his famous sermon on the Trinity there are large flays in the logic, the learning and the criticism. In the discussion which followed, there was not a little bungling warfare on the part of Dr. H. In an address to a Sendary School Convention, helpiste who united in the Convention, virtually excluding Baptist enhanced in the part of Dr. Huntington expects to be severely criticised. The work of criticism has been done as theroughly as the warment opponent of Dr. H. could desire—bow successfully time must show. point and have turned most of their valuable attention to the subject of "negro equality."
The absence of any Homestad plank in the fin the Bouglas Democratic platform shows where that faction stands is relation to this important matter, while the emphatic demand in the Republican platform for "the speedy pasage of the complete and satisfactory House bill," places the position of "Old Abo" and the Republican party beyond cavil or denis. This alone has broken the position of shade "and the control of diarecy.

The meeting in Oquawka, yesterday, was a good one in every respect. The people gave their undisturbed attention, for two hours, to a speech of great power and clearness from Judge

goad ore in every respect. The people gave their undisturbed attention, for two holms, to appeach of great power and electrose from Judge Trumbull. It was one of his best efforts and made a profound impryession upon the minds of his auditory. I heard of several Democratis who had some a long way to hear him, who said that they were new estimated, and should, hereafter, act with the Republises party.

Hos. Jackson Grimshaw of Quincy, followed Judge Trumbull for an heur in a captivating speech, full of sharp, telling points, interspersed with wit and sneedots, which made the entertainment like a dessert after the solid parts of the bill of fare have been discussed.

After deart, five companies of Wide Appaces, with their torches and bands of music paraded the principle streets, and then marched to the grove, where where were more openches delivered by local speakers until 10 o'clock. The day's custrainment wound up with a torch light march from the grove to the river, escorting the Burlington Wide Awakes to their hoat. As the steamer showed off a parting salete was fired, reackes shot high into the sir, the crowd on above cheering for Lincoln and Republication and were answered in kind by those on board. Henderson gave Fremens 14 majority, and two years ago gave Me majority. This fail it will roll up 450 for "Old Abe." There are no Peter Fanks of the Bunk Morris stree hire abouts. The pre slavery Americans have gone over the Douglas openly, while the entire survey Americans are all for Lincoln.

What the Jape think of their Visit t America.

Tommy's Demisionaries of Tracejonal Writes Love Letters and woods to Com Book on Hose the Japanese Conductor Thomatica. Themselves.

The correspondent of the New York Times writing from the Cape de Verde Islands, on board the United States steam frigate Niegarav which vessel is now on her way to Japan with the Amhassadors, gives some interesting details of the voyage and the manners of the Japanese on board the ship. We make the following extract:

occasion, evinced great satisfaction, bowed assirves toward the land, and expressed solves particularly charmed with, and for some some miles voluble about the ty sechery and homes on either shore.

HOW THEY PASSED THE THE.

The Japanese cabin takes in nipely feel of the after part of the spar deck, and was erected I am inforced, including the fittings, at the moderate cost of \$20,000! The after part is devoted to the Ambassadors, who soon after taking possession of it semmarily kicked all the elegant movable furniture out, and then squatting down on the elegant velvet carpets, resumed their na ural positions. The officers of the mission have spacious state cabins forward of their chiefs, while the menials bivonic in a sort of board barrasoon or either side of pair of Dablyston's 11 inch cannon, which, painted as winter as milk, with their commons mouths up in the sir, ceem load in wonder by admiration at their pigmy, burst boot colored, cemi-nuide compliances. The Ambassaders while away the time in eating seven or eight repastive day, puting small whith of tobocco, playing chess and careasing their big teen—the last obtaination affording them apparently the gratest abote and satisfaction. In the evening they mount to the upper d xt in their fluxly panjaminers, which refuncts when agitated by the wind, offers to the amateur anatomist every concerning of any of the proportions of the passimmers, when retiment when agitated by the wind, effers to the amature anatomist every opportunity of studying the proportions of the Japanche system. The hawk-coaed one, however, wears a sort of suit towners, sied to him with a large bow knot at his beet, as does likewise the long toothed diguitary, but the low-legged flows mer and the perior-toed Gemorountest themselves with less expensive materials. When the crew are summoned to evening prayers the Ambanandors regard the preceding with extreme stitention. At first when paragraphic the present countries of the summer of the sum

At New Orleans, was beserve, there are money difficulties, and the rate of discount for abortified paper in an high as 10 per cent.

All the advices from the West speak of unionsginable quantities of wheat and corn, which will bless all consumers at home and abroad. The quantity is no great that the Southern and foreign demand will not have the effect of creating high prices.

The receipts of wheat are large to-day, reaching 15,000 bushels, of which one third is through freight. The balance, was not thrown on the market, being mostly required for delivery to make up lots contracted for last week. The only reported sales are wears 800 red at 105, 1 car do at p. t., and 60 be 80 2 white at \$1.06. No 1 red would command 1.02, and No 1 white present delivery, and 300 fature delivery.

Hose Conne work Missouri.—A gentleman who arrived Saturday morning from St. Joseph, Me., informs in that in the day on which he left that city, about 1,000 hand of Stack hops were shipped to Illinois to be fed with come for the causing port season. At St. Joseph there was a good demand for hogs, and the farmers all around were selling of their stock because of the failure of their corn crop. The prices being paid were to 5000; 25 gross. One dealer has purchased 7,000 hand, and they have been shipped to various parts of this State and Lowa. The "hog crop" in Illinois and lowa will therefore probably be a full one, although that of Missouri and Kaness will be far short of an average. The St. Louis Democrat of years. terday says:

In hogs some movement is had for future deliver, Packers do not like to say exactly what prices they will pay; but a lot of 6,000 head were bought at \$8.00 net, deliverable in November and December, to average 200 fbs, and none to weigh less than 160 lbs. Another dealer has bought 10,000 stock bogs at \$2.500 k.00 gross, for istting. Sull others are buying argely. A St. Joseph gentleman informs us he as bought quantities of come is trade.
